DIVISION OF
OIL, GAS & MINING

Mr. Dave Moody
Georgia-Pacific Corporation
P.O. Box 105605
Atlanta, Georgia 30348-5605

Dear Mr. Moody:

We appreciate the time to meet with you and your staff in Sigurd, Utah, with regard to the disposal of reject wallboard on lands managed by the Bureau of Land Management. Present at this meeting were:

Dave Corkill, Plant Manager, Georgia-Pacific Corporation
Brent Bastian, Quarry Manager, Georgia-Pacific Corporation
Bob Shajary, Geologist, Georgia-Pacific Corporation
Doug Thurman, Natural Resource Specialist, BLM
Michael Jackson, Geologist, BLM

We agreed that Georgia-Pacific would submit the information requested by my staff in a previous letter, dated April 17, 1990, and it will be submitted as an amendment to your plan of operations. This information should be submitted within three weeks which will allow for your travel obligations.

We decided that the previously identified "northern" disposal location is located on patented mining claims, the Crescent claim group. Only the "southern" disposal location is located on unpatented mining claims, the Western claim group. We will evaluate whether to authorize continued disposal of the reject material when this amendment is submitted.

We discussed that the request to amend your plan of operations will be forwarded to Utah Division of Oil, Gas, and Mining for their evaluation, as required by the Memorandum of Understanding between our two agencies. You should also be aware that to dispose of reject material on the Crescent patented claims, you should have permit from the State of Utah.

If you should have any questions, please contact Michael Jackson or Doug Thurman at (801) 896-8221.

Sincerely,

Area Manager

cc: Dave Corkill, Georgia-Pacific
